Tecnosans

IT Infrastructure transformation is on its high pace replacing traditional with automation while tightly securing the new and transformed Infrastructure

Tecnosans evolved from the thought by few technocrats with more than 60+ years of cumulative working experience in the arena of Consulting, Designing, Deploying and Maintaining enterprise IT Infrastructure including Applications and Software especially in Middle East and Africa market. This includes various verticals viz Manufacturing, Hospitality, Retails, Health care and Corporates while still growing to other customer verticals.

Today's world of IT Infrastructure incorporates Virtualization, Hyper Converged Infrastructure, Centralized Mobility Management and Application Development as key pillars with Security as the in-depth protection layer. Security includes end point, perimeter, messaging database, application, access control, identity management and testing.

Tecnosans has great expertise in delivering these highly sophisticated solutions that makes the life of its customers worry-free. Some of the highlights includes

- End-to-end IT Infrastructure Solutions from premium vendors.
- Certified and experienced professionals to deliver projects on time.
- ITIL based service delivery.
- PMP based Project Management.
